## **DETAILED ACTION**

### ***Specification***

1. As previously stated, the lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Allowable Subject Matter***

2. Claims 1-8 and 10-18 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art does not teach or suggest a DC power supply comprising, inter alia, maintaining the bypass switch in the ON state for a time period after the start of the switching operation, wherein the time period is set to prevent or suppress undershoot.

Regarding claim 14, the prior art does not teach or suggest a battery powered electronic apparatus comprising, inter alia, maintaining the bypass switch in the ON state for a time period after the start of the switching operation, wherein the time period is set to prevent or suppress undershoot.

The prior art does teach no time period between switching the bypass switch to the OFF state and starting switching operation of the converter. See Divan (US 7,129,599) at col. 8, lines 43-55. Specifically, at lines 52-55, Divan discloses that the converter may trigger the closing of the bypass switch. There is no discussion, however, regarding a time period before the switch to prevent or suppress undershoot.

Art Unit: 2836

The prior art also teaches placing the bypass switch in the OFF state before the start of switching operations of the converter. See Divan (US 6,118,676) at col. 21, line 38 to col. 22, line 4, and Bobb (US 2004/0164617) at paragraph 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
